Dr G. Englehardt
Dear Dr F.
Dr Fimnich
placed your letter in
my hands requesting
me to procure the said
your mentioned strict
faithfully but was un-
able to get more than two
poor little pieces as I could
not make out so far, but

here I find it in abundance
at low tide some of which
I will send - & more if you
desire. I have always been
interested in it but never
learned anything about
it.

Hoping the specimens
are what you desire
With kind regards -
I am truly yours
Miss Helen Semenbacker

MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN PAPERS

Santa Cruz.
December 8, 1878.

Rev. Engelmann, M. S.

Dear Sir.

Yours favor of
Nov 18. is received & I am
glad to say that I have, at last,
been able to send the right
plant. In Santa Barbara, I
could never reach them.
They grow on large boulders,
which have tumbled in the
sea & the roots seem to imbed
themselves in the rock - I
attempted to get some last
low tide but was caught
by several large waves &
waded out waist high on the
crest fallen. I shall watch them
with interest, collected in
Oct but have observed them

in the state in which I sent
them to you in S. Barbara in
Aug. I think they flower in
June. I will send specimens
from time to time. That you
may observe for yourself -

I hope to remain & establish
myself in a girls school which
at present is not flattering, but
I shall have more time to work
on the beach -

The cedar you
mention grows down the
coast but I hope to be
able to collect some by
sending to Rev. Louis Obispo.
If you are interested in
algae or other plants I
will be glad to contribute.

Yours sincerely -

Helen Pennebaker.
